**Subject:** Application for Fullstack Developer Intern

Hi Akdo Engineering Team,

I am writing to apply for the Fullstack Developer Intern position at Akdo. As a builder deeply interested in the intersection of full-stack engineering and generative AI, I have spent the last year engineering and deploying production-ready applications rather than just following tutorials.

I understand that as a GenAI startup, Akdo needs engineers who can bridge the gap between AI models and reliable, user-facing applications. A few highlights of my recent work include:

- **Engineered AI & Automation Workflows:** Built a Discord bot powered by LangChain and RAG (Retrieval-Augmented Generation) to provide context-aware answers from documentation. I also developed an intelligent web scraper using Python and the OpenAI API to dynamically parse messy HTML and extract structured JSON data.
- **Solo-Shipped a Live Sports Platform (santhalstrikers.in):** Built the complete MERN stack architecture to handle 18 days of real-time cricket matches. I managed database scaling, frontend state, and streaming integration entirely on my own during the live tournament.
- **Built a Production-Grade MERN System:** Developed a complex Hotel Management System featuring secure JWT authentication, strict Role-Based Access Control, and a 61-case Jest integration test suite to ensure deployment reliability.
- **Developed a Cross-Platform Application (Yash Study Hub):** Built the web application and Android APK for a YouTube channel with over 5.86K subscribers, integrating APIs, push notifications, and bilingual support.

I am highly self-directed, comfortable working across the entire stack (React, Node.js, MongoDB, Python), and deeply passionate about building AI-driven products. I am eager to bring this same level of ownership and execution speed to the team at Akdo.

I have included links to my GitHub and live projects in my resume, and I would welcome the opportunity to discuss how I can contribute to your engineering goals.

Thank you for your time and consideration.

Best regards,

**Astitwa Mishra**
