

NOTE ON ACADEMIC & WORK TRANSCRIPTS

Date: June 18, 2026

To the Akdo Hiring Team,

Please accept this formal note regarding the application requirement for university and work transcripts.

I am currently concluding my first year of the Bachelor of Technology (Computer Science and Engineering) program at Dr. A.P.J. Abdul Kalam Technical University (AKTU). Because my first-year examinations are just wrapping up, official university transcripts have not yet been issued by the administration.

However, my practical engineering capabilities and work history are entirely public and verifiable. Over the past year, I have focused heavily on building and deploying production-grade applications, including generative AI integrations, live sports streaming architectures, and full-stack enterprise systems.

My complete work portfolio, which includes live deployed applications and the open-source GitHub repositories containing my code, serves as my active "work transcript." You can verify my technical proficiency directly through these links:

Portfolio & Live Projects: astitwa2006.github.io

GitHub Repository: github.com/Astitwa2006

Current Role: Web Development Intern at SkillCraft Technology (Offer ID: SCT/JUN26/6487).

I am fully prepared to demonstrate my technical skills via any coding assessments or technical interviews you require.

Thank you for your understanding.

Sincerely,

Astitwa Mishra
