PROFESSIONAL EXPERIENCE

Yash Study Hub — Mobile & Web App - Live Web App | APK Download

MAY 2026 – JUN 2026

Full-Stack Developer & Cross-Platform Engineer

Remote (Freelance)

- **Backend & API:** Designed the entire data layer and authored all API logic — YouTube Data API integration with localStorage caching, Telegram RSS feed parsing as authoritative news source, and global search across videos, PDFs, and news content types.
- **Frontend (Web App):** Engineered a responsive, mobile-first web interface in Tailwind CSS with the channel's gold/black brand identity, custom animations, and a bilingual (Hindi/English) UI for a student audience of **5.86K+ subscribers**.
- **Cross-Platform & Infrastructure:** Wrapped the web app into an **Android APK using Capacitor**, integrated **OneSignal push notifications** for both web and Android, implemented service worker offline caching, and deployed on Vercel with CORS proxy rewrites.

Smart Hotel Management System - Live Link

FEB 2026 – APR 2026

Full-Stack Developer

Remote

- **Architecture & Security:** Built a MERN monorepo, implementing robust **JWT authentication and bcryptjs hashing** with strict **Role-Based Access Control (RBAC)**.
- **Frontend & API:** Developed a responsive **React/Vite SPA with Tailwind CSS** for room booking and dining, powered by RESTful endpoints and custom error-handling middleware.
- **Testing & Deployment:** Engineered a **61-case Jest E2E integration test suite**, automating cloud deployments on **Vercel and Render**.

santhalstrikers.in

MAY 2026 – PRESENT

Lead Full-Stack Developer & DevOps

Ghaziabad, UP (Remote)

- **Single-handedly engineered** and deployed the official sports league website — full MERN stack, custom database schemas with MongoDB & Mongoose, responsive React UI, and domain/server management for the live tournament (June 10–28, 2026).
- Integrated live scores APIs and coordinated with streaming providers for real-time broadcast delivery; handled **CORS configuration, environment variables, and production deployment pipeline** end-to-end.

EDUCATION

G.L. Bajaj Institute of Technology and Management (AKTU)

2025 – 2029 (Expected)

Bachelor of Technology — Computer Science and Engineering

Greater Noida, UP

TECHNICAL SKILLS

Programming/Scripting Languages: Python, JavaScript, TypeScript, C++, HTML/CSS, SQL

Frameworks/Libraries: MERN Stack, React Router, Vite, Tailwind CSS, Axios, LangChain, JWT, Bcrypt, Capacitor, OneSignal, Service Workers (PWA)

Databases & Caching: MongoDB, Mongoose, MongoDB Atlas, PostgreSQL, SQLite, Redis, localStorage

Tools & Testing: Git, Docker, Postman, Vercel, Render, Jest, E2E Testing, REST APIs, Webhooks, CORS Proxy

CS Fundamentals: Data Structures & Algorithms, Object-Oriented Programming, DBMS

PROJECTS

AI WEBSCRAPER - Link

MARCH 2026

Technologies Used- Python, OpenAI API, BeautifulSoup, Selenium

- Designed and built an intelligent web scraper that extracts raw HTML data and uses LLMs to parse and structure dynamic content.
- Handled dynamic pagination and bypassed anti-scraping protections using Selenium and custom user agents.
- Deployed as a reusable API returning clean JSON data, reducing data extraction time by **75%** for automation workflows.

DISCORD AI BOT - Link

JANUARY 2026

Technologies Used- Python, discord.py, LangChain, SQLite

- Developed a conversational Discord bot using LangChain to query custom knowledge bases with Retrieval-Augmented Generation (RAG).
- Implemented an automated moderation system using OpenAI's moderation API to flag and filter toxic behavior in real-time.
- Optimized system response time to under 1.5 seconds by utilizing SQLite database for local caching of context.

AUTOMATION DASHBOARD - GitHub | Live Deploy

NOVEMBER 2025

Technologies Used- React, Node.js, Express, n8n, Axios

- Engineered a full-stack dashboard to monitor and trigger automated workflows across Slack, email, and CRMs.
- Connected n8n webhooks with custom Express.js backend endpoints using Axios for reliable state synchronization.
- Built a clean, real-time React UI to visualize active automation jobs, logs, and system health status.

ACHIEVEMENTS

- **Freelance Delivery:** Shipped two production client projects in freshman year — a live sports tournament platform and a full-stack mobile+web app for a 5.86K-subscriber YouTube channel, both with real users and live deployments.
- **Cross-Platform Engineering:** Independently packaged a web app into an Android APK using Capacitor, implemented OneSignal push notifications and PWA service worker caching — gaining hands-on mobile deployment experience with zero prior Android background.
- **Production Quality:** Maintained industry-standard practices across all projects — JWT auth, RBAC, 61-case Jest test suites, CORS configuration, environment variable management, and CI/CD pipelines on Vercel and Render.
- **LeetCode:** Solved 100+ problems, maintaining a consistent problem-solving habit alongside active project work.
